

 **SOLATUBE**  
Whole House Fan

**Hot, stale air out.**

**Cool, fresh air in.**

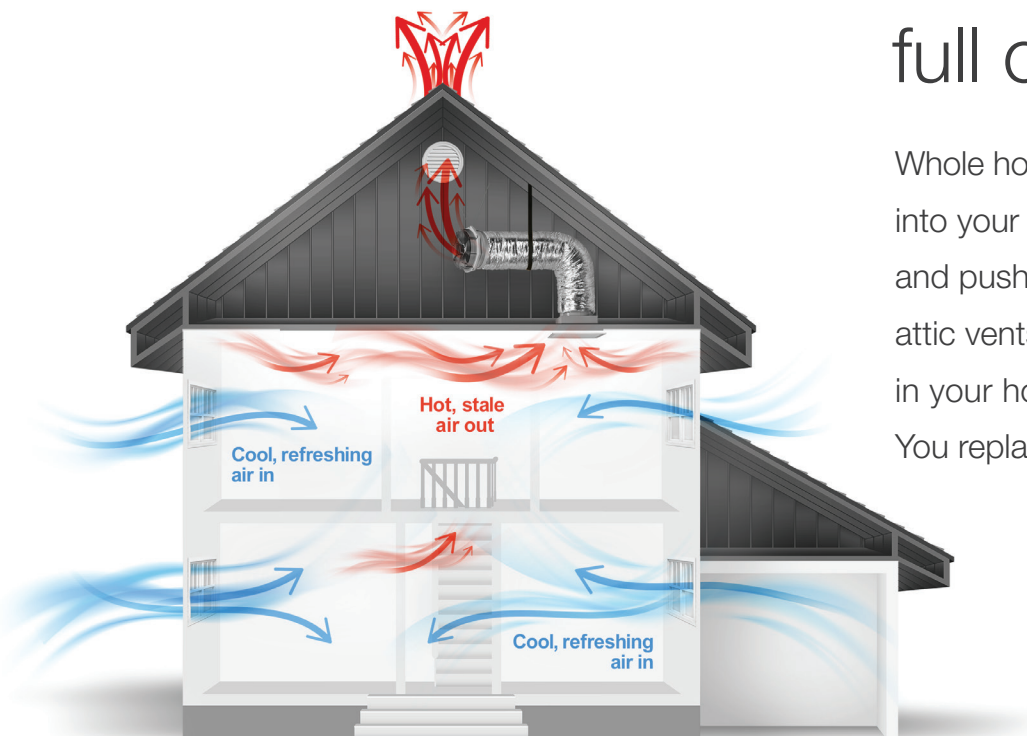

# Feel fresh. Feel great.

- Fresh air circulates throughout the entire home in minutes
- Quickly cools in hot summer months
- Eliminates stale air in the winter months
- Improves air quality and removes odors
- Creates a healthier home environment
- Extremely quiet fan avoids household disruption
- Helps reduce air conditioning costs

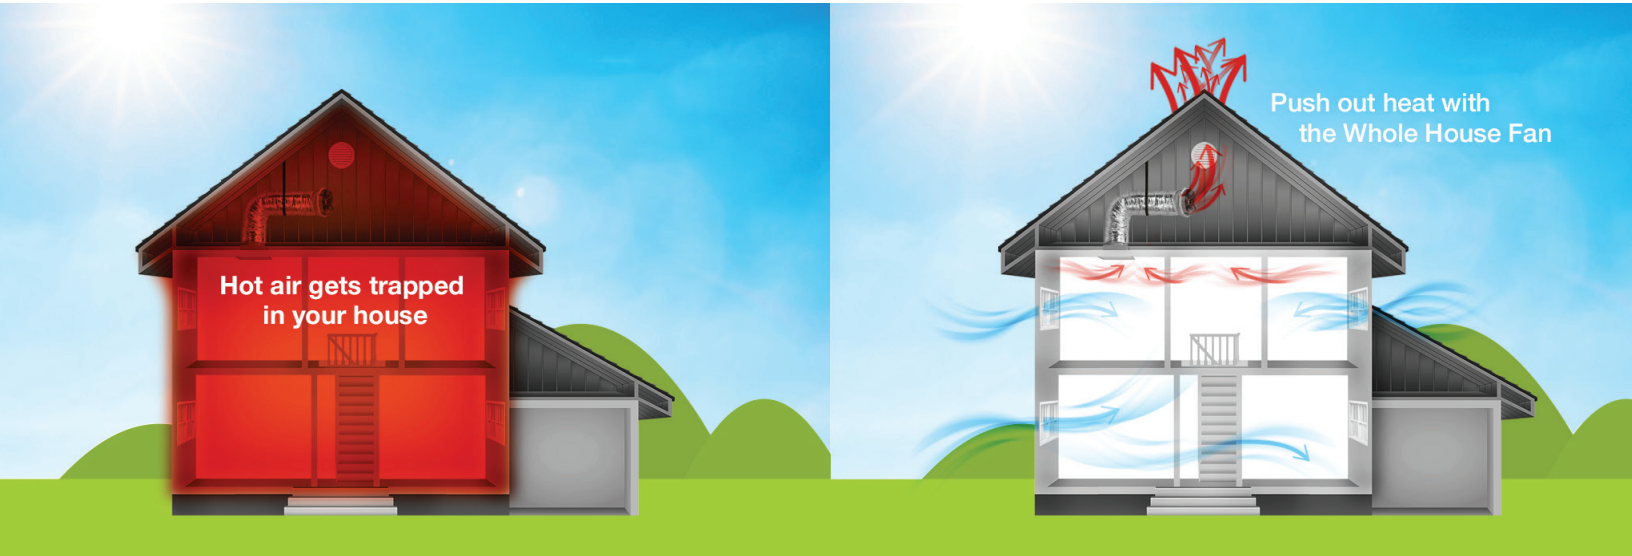

## Comfort comes full circle.

Whole house fans will pull the fresh, outside air into your living space through your windows, and push stale, indoor air out through your attic vents. So you don't just recirculate air in your home (as with air conditioning). You replace it with fresh air. Over and over.

# Cooler and fresher. All day. All summer.

During the warmer months, using the Solatube Whole House Fan not only cools the air in your house, but also the structure and contents. This helps cool the home and attic by up to 30 degrees, and sometimes more, allowing them to stay much cooler the following day (the principle of Thermal Mass Cooling). So overall costs to keep the home cool are dramatically reduced, especially as compared to air conditioning.

# Cleaner winter air. Healthier home.

During the colder months, the air you seal in your home tends to get stale and full of impurities and odors. (Sorry, it's true.) Solatube's Whole House Fan can quickly move that dirty air out of your house and replace it with clean, fresh air. (So quickly that it won't even make your house cold.) This means you and your family stay healthier and feel better throughout the season.

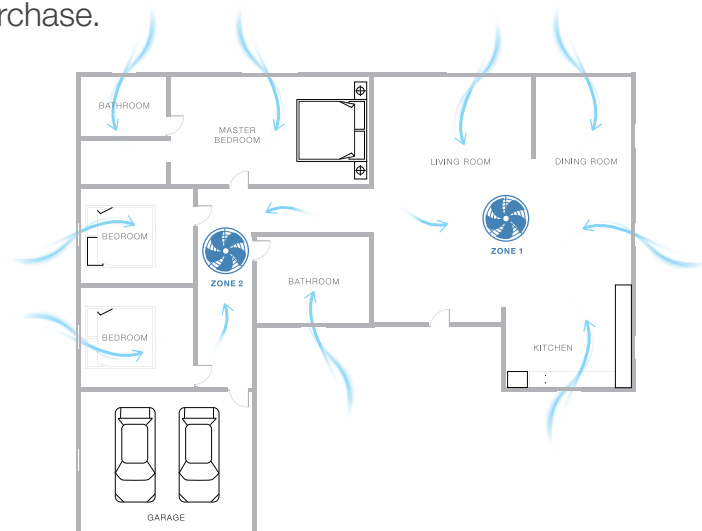

## Built to last. Built to blast.

- 1 Brushless Motor: for long-lasting strength and energy-efficient operation
- 2 Powder Coated Metal Components: for durability and rust-proof operation
- 3 5-Blade Fan: for smoother airflow
- 4 Insulated Ducting: for quiet cooling
- 5 No Visible Vent Fasteners: for a clean and modern look
- 6 Easily Removable & Dishwasher-Safe Intake Grill: for quick and easy cleaning

## Fresh solutions for your home.

We have four models that can be used alone or combined to cover all the zones in your house. Our Certified Installation Consultants can help you choose the right configurations with a free in-home consultation, with absolutely no obligation to purchase.

		CFM:	1500	3000	4500	6000
<b>Home Size</b>	Up to 1500 sq ft					
	1000 sq ft - 2500 sq ft					
	2000 sq ft - 3500 sq ft					
	3000+ sq ft					

# Our Premier Services

As a Solatube Premier Dealer, we have been installing tubular daylighting systems and solar attic fans for years, bringing beautiful natural light and creating comfortable interiors in homes. And now we're bringing even more relaxing and refreshing environments to our customers with whole house fans.

**2 hours to install**

**No structural modifications  
to your home**
